### Certificate Course in Basic Computer Applications

In addition to the B.A., L.L.B., B.Sc.(Homescience) courses, our college will launch certificate course in Basic Computer Applications which is equivalent to MS-CIT course. We will equip the students with innovative Computing skills and applications in day-to day life like PAYTM, Bank tranjunction. This course will have start date 15<sup>th</sup> JULY 2017. For further information, student should contact Dr.A.M.Chaudhari.

#### **Objective of the Course :**

Computer Technology's impact on individuals and our world. There is a need for conducting such certificate courses for the students to broaden or upgrade their skills to keep pace with changing needs and to further their career opportunities. This course will help the student to perform day to day life applications like

- Identify the appropriate use of e-mail and e-mail related "netiquette".
- Identify different types of information sources on the Internet.
- Be able to use a Web browsing application.
- Be able to search the Internet for information.
- Be able to create and format simple presentations.
- Be able to use different Apps.

This course will develop confidence and self-esteem by helping students to become involved in Computer Training. This course will provide students with the opportunity to gain accredited, marketable work skills which in turn can lead to employment opportunities.

# Yeshwant Mahavidyalaya, Wardha

- To eliminate the perception that Computer technology is passing people by and to increase the general awareness of the possibilities offered by Computer Training

**Basic Knowledge of Stock Market**

Organized by

**DEPARTMENT OF ECONOMICS**

**About the course:**

Certification in Online Stock Market for Beginners is a perfectly designed stock market basics course, to create a powerful knowledge bank on various tools and techniques required to understand the functioning of capital markets. It gives a basic insight of financial jargons like Equities, IPOs, Derivatives, Technical Analysis of stock market, Macroeconomics and Financial Planning. It is a perfect blend of Fundamental Analysis of stocks, which shall help the investor to pick the right company and Technical Analysis which will provide the correct entry and exit timing and prices through study of charts.

**Objectives:**

The Objective of the course is to equip the participant with necessary stock market theoretical and practical know-how so that students can apply the same in researching equity markets for wealth creation. It introduces you to the process of how to find and analyze companies, determine the risk of a stock investment or trade, proper entry and exit time of the stock, understand why markets move the way they do, and helps you choose the right trading style for your personal goals using correct approach to financial planning. If you're new to the stock market and want to know the basics, this is the tutorial for you!

Eventually the course will help students to figure out if they want a career in this area of business.
