Assignment Questions

Unit I

- Explain the concept of scalar quantity and vector quantity with two suitable examples of each.
- 2. Write the main features of FPS, CGS, MKS and SI system of units.
- 3. Explain the necessity of measurement of physical quantity.
- 4. Define physics and explain the need of Physics in day to day life.
- 5. Compare FPS, CGS and MKS system.
- 6. Explain the concept of least count of a measuring instrument.
- 7. Define significant figure.
- 8. Explain the rule to find out significant figure.

Unit II

- Explain the concept of fundamental and derived quantity with two suitable examples of each.
- 2. Define area, force, pressure and kinetic energy and derive their SI units.
- 3. Define mass, density, velocity, acceleration, work done, pressure with their SI unit.
- Define electric current, power, resistance, temperature, pressure and classify them into scalar and vector quantity.

Unit III

- Explain the concept of centripetal and centrifugal force with two suitable example of each.
- 2. What is friction? Write any three advantages and disadvantages of friction.
- 3. Explain Newton's first law of motion with two examples.
- 4. Explain Newton's second law of motion with two examples.
- 5. Explain Newton's third law of motion with two examples.
- 6. What is uniform circular motion? Write an example of it.
